Muhammad Fahad Qureshi

Senior Flutter App Developer
Karachi, Pakistan | +92 347 2329591 | mfahadfaizi@gmail.com| LinkedIn | GitHub

Summary

Senior Flutter Developer with 6+ years of experience engineering high-performance, scalable cross-platform mobile applications for iOS and Android. Expertise spans cloud-based architectures (AWS, Firebase, Supabase), robust API integrations, and implementing advanced AI features (OpenAI, Gemini, Claude). Proven track record of spearheading 20+ production-ready apps across e-commerce, real-time communication, and marketplace sectors. Adept at leading cross-functional international teams and managing full-cycle App Store and Google Play deployments

EXPERIENCE

- **Flutter Developer (Part-Time Remote) – LinkYou, Canada** Feb 2026 – Present
  Working remotely with a Canadian company to develop and maintain Flutter applications. Remote
  Contributed to HalalDil and HalalDil Partner applications.
  Implemented authentication, user management, notifications, and real-time functionality.
  Collaborated with international teams using Agile methodologies.
- **Sr. Flutter Developer – Weblinx Solution** Feb 2023 – Present
  Developed and maintained 20+ Flutter applications with over 100,000+ combined downloads across iOS and Android platforms using Flutter and GetX/Provider for state management. On-site
  Integrated Supabase, Firebase, and AWS for real-time data sync, user auth, and scalable backend.
  Implemented AI-powered features using OpenAI, Gemini, and Claude Sonnet.
  Delivered apps with streaming, dynamic linking, push notifications, and App Store / Play Store deployment.
- **Flutter App Developer – IT Media Zone** Nov 2021 – Mar 2023
  Built and maintained production-grade Flutter apps.
  Worked with Firebase and REST APIs, managed state using BLoC, Provider and GetX.
  Participated in agile team collaboration, client meetings, and Flutter-based product strategy.
- **PHP Programmer – Deevloopers** Karachi, Pakistan
  Created backend logic using PHP and MySQL. Feb 2021 – Dec 2021
  Worked closely with frontend teams to deliver custom software solutions.

TOP PROJECTS

- **VapVap Eats – Food Delivery Service (Aruba)** Play Store | App Store
  Multi-restaurant food ordering app.
  - Primarily operates across the island of Aruba
  - Users can order food from a variety of local spots and global chains via an app, with real-time order tracking and fast delivery.
  - The platform also caters to businesses and independent drivers, allowing restaurants to broaden their customer reach and drivers to earn daily payouts.
  - Admin panel for managing bookings and facility availability.
  - Language localization support for Papiamento, Spanish, Dutch and English
- **Gymbudd – Social Fitness Apps (UAE)** Play Store | App Store
  Ultimate Social Fitness App Designed to Help You Connect with Like-Minded Gym Enthusiasts.
  - Users can create detailed personal profiles outlining their fitness goals, interests, and availability.
  - The app uses the user's location to find nearby, compatible workout partners.
  - Provides a built-in messaging system for users to communicate and plan workouts securely within the app.
  - Offers the ability to search for and book sessions with local personal trainers and gym facilities.
  - In-app purchases for Monthly Subscription using (Revenuecat)
- **Gigfinder – Event & Tour Scheduling for Artists (US)** App Store
  A discovery and planning app for musicians and performers to list upcoming gigs and tours.
  - Artists, DJs, and live performers can find gig opportunities close to them.
  - Created public event listings and private tour planning features.
  - Users could map out multi-city tours, share schedules, and track fan engagement.
  - Built social sharing, ticketing info, and QR code check-in modules.

- **TaxiGo (Rider & User Apps) – Cab Booking Platform (Portugal)** Play Store
  Dual-app solution for a local ride-hailing service in Portugal, similar to Uber.
  - Real-time driver tracking, location picker, fare estimation, and trip history.
  - Admin dashboard integration for fleet management.
  - Language localization support for Portuguese & English.
- **SyncMeet** Play Store | App Store
  Meeting & Scheduling Platform
  - Developed scheduling and collaboration features.
  - Integrated notifications and user management.
- **Car Profito (Europe)** Play Store | App Store
  Automotive Marketplace Platform
  - Built listing and vehicle management modules.
  - Integrated real-time updates and cloud backend.
- **Mecca Center (USA)** Play Store | App Store
  - Community and event management application.
  - Event scheduling and notifications.
- **Run For Paws** App Store
  - Community and event management application.
  - Event scheduling and notifications.
- **John AI (USA)** Play Store | App Store
  - Implemented AI-powered features using OpenAI and Gemini APIs.
  - Developed conversational interfaces and smart workflows.
- **Mahari (UAE)** Play Store | App Store
  Mahari is your all-in-one football training and skill development app
  - Developed a football training and skill development application providing structured learning paths for players of all skill levels.
  - Implemented coaching, training progression, and performance tracking features to support player growth and skill improvement.
  - Built user engagement and rewards systems, enabling athletes to unlock achievements and access exclusive football training content.

EDUCATION AND CERTIFICATIONS

- **Aptech Pakistan – ACCP Prime (Computer Science)** 2019 — 2022
- **Govt. Superior Boys College – Inter (Engineering)** 2015 — 2017
- **Certifications – Flutter & Firebase (Udemy), Mobile App Dev (Udemy)**

SKILLS

Mobile Development
- **Flutter**
- **Dart**
- **Android**
- **iOS**
- **WatchOS**
- **VisionOS**

State Management
- **GetX**
- **BLoC**
- **Provider**
- **Riverpod**

Backend & Cloud
- **Firebase**
- **Firestore**
- **Firebase Functions**
- **Supabase**
- **AWS**
- **REST APIs**
- **GraphQL**

AI Integrations
- **OpenAI GPT**
- **Gemini**
- **Claude Sonnet**

Payments & Monetization
- **RevenueCat**
- **In-App Purchases**
- **Stripe**

Communication & Maps
- **Google Maps**
- **Geolocation**
- **Push Notifications**
- **Dynamic Links**
- **Deep Linking**

Development Tools
- **Git**
- **GitHub**
- **GitLab**

- **Postman**
- **Android Studio**
- **Xcode**
- **VS Code**

Architecture

- **Clean Architecture**
- **MVVM**
- **Repository Pattern**
- **SOLID Principles**
